Minister of Federal Education and Professional Training Rana Tanveer Hussain and US senator of Utah Keith Grover with others at closing session.

Tanveer urges policymakers to revamp curriculun

STAFF REPORTER

Minister of Federal Education and Professional Training, Rana Tanveer Hussain Friday urged the policymakers and practitioners to review and revamp the curricula, invest in building capacities of teaching and research faculty and bring about a paradigm shift from subject-focused rote learning to an interdisciplinary ap-proach to research and education.

He was addressing the closing session of "the

International Summit on Higher Education and Workforce Development in 21st Century" organ-ized by USAID and HEC. United States Sena-tor of Utah State, Keith

Grover also attended the event held at a local hotel.

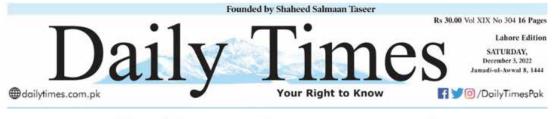

The federal minister said that the USAID's Higher Education System Strengthening Activity (HESSA) between the Governments of the USA and Pakistan which is worth \$19 Million, is yet another initiative that will support our 16 universities in improving their institutional and technical capacities in delivering market-relevant education and research.

Rana Tanveer emphasized to pay focus on improving institutional governance, curriculum, access and quality, teaching and research practices, industry-academia linkages, and climate change adaptation.

He said that it is a reality-whether we like it or not-most stakeholders complain that our education system does not equip the students with knowledge, experience, skills, or values needed to thrive in a rapidly changing world.

"It is clear to everyone that business as usual is not an option to reverse this trend. We need to be bold, innovative and committed to achieving the three-fold objective of improving access, quality, and relevance of our higher education." He also called for prioritizing advancing social justice by mainstreaming marginalized communities into the higher education system. The federal minister said that the key

challenges that are faced by our higher education sector that need to be addressed are low and ineq-uitable access; traditional teaching and research techniques; weak industry and academia linkages; weak management and governance amongst a myriad of others. The minister continued, "If we invest in our higher education system in terms of strengthening leadership and policies; enhanc-ing faculty's teaching and research capacities; strengthening industry-academia linkages

Policymakers urged to revamp curricula, research faculty

M inister of Federal Education and Professional Training, Rana Tanveer Hussain Friday urged the policymakers and practitioners to review and revamp the curricula, invest in building capacities of teaching and research faculty and bring about a paradigm shift from subject-focused rote learning to an interdisciplinary approach to research and education.

He was addressing the closing session of "the International Summit on Higher Education and Workforce Development in 21st Century" organized by USAID and HEC. Realignment of higher education system underscored

By Jamila Achakzai December 03, 2022

Islamabad:Federal education minister Rana Tanveer Hussain on Friday underscored the importance of realigning the country's higher education system with emerging needs and trends in an ever-changing socio-economic landscape.

> He was addressing the closing ceremony of the three-day international summit on higher education organised by the USAID-funded 'Higher Education System Strengthening Activity' project.

The initiative is meant to provide technical assistance to several Pakistani Universities through the University of Utah, USA, in three broad areas, including leadership development and institutional governance, faculty development, research, curriculum modernisation, entrepreneurship, and student support services.

The summit included the HEC leadership, a Utah State Senator, government officials, and representatives from different public and private sector universities. The summit brought together around 40 national and international experts from various fields to speak to around 160 participants. The summit served as a means for establishing a community of practice among higher education institutions and to launch subsequent policy dialogues to enrich the higher education policy-making process.

The sessions focused on improving the market value of degree programs, including dialogues on challenges and opportunities, how practices differ amongst Pakistani universities, and how they align with international best practices.

A key topic was the effects of the recent floods on the higher education sector and how to advance climate education at different levels. The final session of the summit chaired by climate change minister Sherry Rehman also explored linkages between higher education and climate change resilience.

She said Pakistan was among the most climate-affected countries in the world and has been affected by massive floods many times in the recent past. The experts emphasized the need for more interdisciplinary research and knowledge both on the prediction side and on the adaptation front.

HEC Executive Director Dr. Shaista Sohail said the summit had generated useful recommendations for elevating the impact of higher education towards improving workforce development. He said the HEC would examine aligning these recommendations with ongoing and planned initiatives.

Taking stock of the summit proceedings, US Senator Keith Grover congratulated academia and the private sector for their active participation. He said through these coordinated efforts across all sectors, the role of universities could be enhanced to address the socioeconomic development challenges including the adverse impacts of climate change.

USAID Mission Director Reed Aeschliman said, "We will continue to work together for sustainable solutions to strengthen Pakistan's higher education ecosystem, particularly in the areas of research and policy reforms." Pray

disease (Covid-10) in Duals, Barreladosh, Sentember 12, 2021, PUICTO: RELITERS

Speakers at an international summit on higher education Friday emphasised the need to align Pakistan's higher education sector with emerging needs and trends in an ever-changing socioeconomic landscape.

The conference was organised by USAID's Higher Education System Strengthening Activity.

Federal Minister for Education Rana Tanveer Hussain highlighted the importance of readjusting the higher education system in accordance with emerging needs and trends.

The summit brought together approximately 40 national and international experts from various fields to speak to about 160 participants, the statement said.

The conference served as a means for establishing a community of practitioners among higher education institutions and to launch subsequent policy dialogues to enrich the higher education policy-making process, it further read.

The communique also stated that the sessions focused on improving the market value of degree programmes, including dialogues on challenges and opportunities, how practices differ amongst Pakistani universities, and how they could be aligned with international best practices.

A key topic was the effects of the recent floods on the higher education sector and how to advance climate education at different levels.

The final session of the summit chaired by Federal Minister Sherry Rehman also explored linkages between higher education and climate change resilience.

The experts emphasised the need for more interdisciplinary research and knowledge, on both, the prediction side and the adaptation front, the statement said.

Addressing the participants, Sherry Rehman said Pakistan is among the most climate affected countries in the world and has been affected by massive floods many times in the recent past.

Modernization of higher education system key to progress: Minister

Set, FIRe 2023, 11:17 AM

Rana Tanviar Hossan

ISLAMABAD, Dec 3 (APP): Federal Minister for Education and Professional Training Rana Tanveer Hussain Saturday said that the modernization of the higher education system is the key to the country's progress and prosperity and the government was taking result-oriented steps for improving the education system.

The government schools would be standardized across the country, he said while talking to a PTV news channel.

In line with the vision of Prime Minister Shahbaz Sharif that the government has initiated various steps for making education accessible to youth by giving them a level playing field by modernizing the higher education system in the country, he said, adding, we are paying special attention to the higher education as well as character building of the students so that they could use their leadership abilities for the betterment and sustainable development of society.

Minister said the educators of the government high schools are the valuable assets of the nation and we must restore their respect and provide facilities and funds to them on a priority basis.

He said the government under a well-devised strategy would take various steps to develop a higher education system including the establishment of new schools, rehabilitation, and improvement of existing schools, merit-based recruitment of teachers, and provision of scholarships to students to enhance literacy rates.

The government has taken more initiatives to digitalize students' databases and faculty development would also be launched in the higher education departments, he added.
